"Mammal Sighting" Printable Sheets

"Mammal Sighting" sheets are provided to put at each station.

Students can record a "sighting" (or a visual) of the animals on these sheets, in addition to identifying other animals by their tracks.

The purpose of these sheets is to: 1) ensure students understand that animals move around to multiple locations, and 2) know that most locations have multiple animals there.

Instructions

1. Print enough sheets for the number of stations you need.
2. Fold the sheet up at the dotted line, as in the picture.
3. Place each sheet on its corresponding station.
4. When students arrive at the station they flip open the paper and record the animal they see in their data packets!

Note: There is NO "spotted animal" for station B (Forest)

Station A: Hehlkeek 'We-Roy , Klamath River

You walk up the river bank toward the forest edge to look for more tracks/signs and to your delight you spot . . .

Elk!

Meweehl

Station C: Sepolah, Prairie

You are walking quietly at the prairie's edge and notice an animal frozen in front of you, about to dart away into nearby brush. It is . . .

A rabbit!

Herk'werh

Station D: Raak, Creek

A slight sound near the edge of the creek makes you turn your head. You look and see . . .

An otter!
