

Meet a Scientist: Dr. Flip Tanedo

Meet Dr. Flip Tanedo! He is a scientist who studies **physics**.

Physics is the study of matter, motion, energy, forces, and more. Some **physicists** study space. Flip studies galaxies.

Flip asks "What kind of **matter** makes up our galaxies?" He studies something called **dark matter**.

What did Flip need to learn for his job? He learned about light waves, sound waves, forces, math, space, and more.

A peak into Flip's childhood

Flip developed his love for science when he was young. Part of his love for science came from TV shows!

Star Trek

Growing up, Flip loved a TV show called Star Trek. In this show, people have adventures in space. The show is fiction, but some parts of the show are based on real science.

Star Trek inspired Flip to become a scientist!

Flip hopes you love science too!
